Ackerman Family Vineyards: Coombsville, Community & Culture

Lauren Ackerman has been a community fixture in her beloved Napa for the past 27 years. Her business background, passion for winemaking and her love of giving back to the community is what is imbued in every bottle that is created at Ackerman Family Vineyards.

Ackerman Family Vineyards began with a dream when the Stonehaven Vineyard in the Coombsville AVA was purchased by Lauren and her former husband in 1994. The first commercial bottle of Cabernet Sauvignon was produced in 2003 and since that early beginning, Lauren and her team have focused on creating elegant world class wines that echo the passion, commitment and determination in creating an authentic and enduring brand.
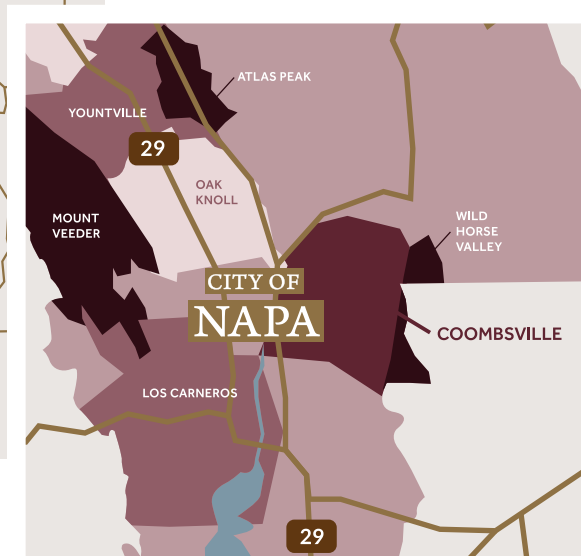

A Modern Bordeaux—A marriage of Old-world techniques and respecting Napa Valley's fruit

- Richly crafted wines with balance and complexity.

- Third-generation Napa Valley Winemaker Leo Tellez elevates focus on farming our Stonehaven vineyard and tracks each vine to barrel.

- Cooler temps and an extended growing season combined to make balanced expressive wines.

- Cold soak and extended maceration brings fruit, color, complexity and velvety round soft tannins

- Leo Tellez mentored by Denis Malbec, three generations of family members who worked at Chateau Latour in Bordeaux. Leo has been focusing on the Coombsville AVA for the last 9 years and has mastered the understanding of the appellation

Stonehaven Vineyard:
SINGULAR SITE EXPRESSION IN THE NAPA VALLEY'S COOL COOMBSVILLE DISTRICT

- The 11-acre Stonehaven Vineyard is famed to ensure that it's character and terroir resonates within the wines it produces.

- Stonehaven Vineyard planted in all five Bordeaux varietals which match rootstock and varietal to site and soil.

- Volcanic soil, diatomaceous earth and a diversity of slope and exposures create complexity in the wines.

- Stonehaven is the first certified organic vineyard in the Coombsville appellation.

- The biodiverse organic farm includes vegetable gardens, hawk habitat and natural cover crops providing nutrients for the vineyards.

Coombsville is Napa Valley's newest appellation in southeastern Napa Valley, with cooler climate and a distinctive mix of well-draining river rock and mineral-rich volcanic ash soils.
